Into the See-Through Heart

I'm not alone in feeling that we arrive in this world with intuitive senses well beyond the five we commonly name, and a deep, heart-full connectedness to the living world around us. But all too quickly those precious intuitions are muffled by the noise and clamor, the perceived 'must do's' of life.

With and through this book, I'm thrilled to begin the process of re-discovery, to turn back my own pages of time and to reconnect with the things I intuited as a small child...and I'm additionally delighted to find that some of the greatest 'teachers' of our time are encouraging us to do just that.

The See Through Heart was called into being by three events that awakened something sleeping inside me: The birth of our first grandchild, a significant birthday of my own, and the death of a dear and brave black cat.

It would thrill me to think that reading any one of these exchanges could spark a conversation or encourage you to put on your 'child eyes' and notice the little things that you pass by every day... to pause and meet our own precious intuitions once again. W
